

I have been an XM subscriber for only one month and I can not tell you how valuable the local traffic and weather service is! The ability to have that information on demand while in transit is so beneficial. In one month I have been saved from two 2-hour delays on I76....KYW's "traffic and transit on the two's" would not have provided that information quickly enough...I would have been stuck!!

Please keep the service available! Maybe the local stations simply need a very small percentage of the XM radio subscription to justify the loss of listeners?

Thank you...Matt DiAddezio
